THE FACTS

Millions of People

There are 285 million blind & vision impaired people in the world. They all have amazing gifts to contribute to society, but they need the right tools to realise their dreams.

Technology Is The Key

The Issue

Unfortunately many screen readers cost thousands of dollars — often more than the computer itself. This holds millions of people back from affording to use a computer and discovering their potential.

A Free Solution

We have spent over 15 years developing the global solution: a free, high quality screen reader, accessible to all! NVDA: Non-Visual Desktop Access. We have already enabled 250,000+ people to gain freedom, education and employment!

HOW TO GET INVOLVED

WHAT OUR USERS SAY

"I am so thankful for the creation of NVDA. It has really changed my life. With NVDA, I do not have to worry about spending tons of extra money on third party software to use a computer. I can purchase

– Reina Brown, United States
